rona decorations

RONA Glasswork Co. LTD celebrated an important anniversary during the year 2012.

*During the past 120 years of its existence the glassworks has been doing its utmost to stay on top of technological developments in the glass industry. As evidence of this fact, there are many innovations which have been instituted during this time. Among the many milestones we note the year 1896 when the first machine for pantograph etched decoration in continental Europe was installed at our factory.*

More recently, in the year 2001, the Rona factory was first in the world to introduce automatic production of stemware with pulled stems using the so called double blowing technology. This technology represents the most progressive advance in the field of drinking glassware production. Rona 's leadfree-crystal blanks, made by using either the machine- pulled or joined-stem technologies, are very suitable for all kinds of decorating techniques.

*Decorations can form an integral part of many household glassware items.*

Using various decoration techniques enhances the clear shape of the glass item and thus creates its very individual appearance.

*Decorations also follow fashion trends and allow the choice of suitable techniques, including the use of colors, to keep up with the trends.*

Decorations function as an integral part of the glass item. Decorations, whether by hand, machine made, or using combined techniques, can beautify the object with modern or traditional styling.

*Rona Glassworks is capable of using an almost unlimited variety of decorating techniques to embellish the clear glass, such as pantograph etching, diamond cutting, hand grey cutting, hand painting of metallic rims (gold and platinum), hand painting of luster colors, spraying of organic colors, sand blasting, screen printing, and applying decals.*

*We challenge our designers to create unique solutions for today's living needs. The result, presented in this new catalogue of decorations, is an evolving spectrum of elegant collections which celebrate Traditional, Classic, Transitional and Contemporary designs.*

The present catalogue shows the successful merging of a century of tradition with modern technology to produce a harmonious unity between aesthetics and function for the enjoyment of your senses.

*At this time we are proud to introduce Relief Rona panto etching which will enhance the visibility of the decoration, and give your table setting a more luxurious appearance at a reasonable cost.*

It is our pleasure to present you with this new catalogue of decorations where you can find many techniques and decorations to suit your individual needs and demands.

*We are offering you a wide range of decorating options to suite all budgets. Our goal has been to offer decorations that add much perceived value without significantly increasing the cost.*

We invite you to use your imagination to participate in the creative atmosphere displayed in this catalogue.
